## RESEARCH INTEREST

---

General relativity and modified gravity.

## EDUCATION

---

2018 - 2023	<b>Five Years Integrated M.Sc. (Physics)</b> [Gold Medal] Department of Physics, Sardar Vallabhbhai National Institute of Technology Surat, India ( <a href="http://svnit.ac.in">svnit.ac.in</a> )	CGPA: 9.70/10
2016 - 2018	<b>Senior Secondary Education</b> Kendriya Vidyalaya No.1 Sagar Madhya Pradesh, India	93.0%
2014 - 2016	<b>Higher Secondary Education</b> Kendriya Vidyalaya No.1 Sagar Madhya Pradesh, India	CGPA: 10/10

## RESEARCH EXPERIENCE

---

2023	<b>Master's thesis: Cosmology in <math>f(Q)</math> gravity</b> <b>Advisor:</b> Prof. Kamlesh Pathak This project investigates in detail the motivations for modified gravity and looks towards developing the Einstein's field equations and the dust matter evolution model in $f(Q)$ . <a href="#">[DissertationReport]</a>
2022	<b>Orbital motion of a test particle in STVG gravity around a static spherically symmetric solution</b> <b>Advisor:</b> Prof. Kamlesh Pathak This project involved examining the existence of a static spherically symmetric solution in the Scalar-Tensor-Vector Gravity and developing an effective potential to compute the radius of the innermost stable circular orbit (ISCO) for timelike and lightlike trajectories. <a href="https://arxiv.org/abs/2211.02008">[https://arxiv.org/abs/2211.02008]</a>
5-30th July 2021	<b>Summer Student: Hamburg International Summer School Particles, Strings &amp; Cosmology</b> Department of Physics, Universität Hamburg and DESY <a href="#">[certificate]</a> Lessons on general relativity, QFT, modern topics in cosmology, particles, string theory with some basic German culture and language courses.
12-23 July 2021	<b>International Summer School on The interstellar Medium on Galaxies from the Epoch of Reionization to the Milky Way</b> <a href="#">[ISM; certificate]</a> observational constraints, the interpretative tools and the theoretical frameworks used for studying the interstellar medium in galaxies from the epoch of reionization to contemporary Universe
7-18th June 2021	<b>Summer Student: Escape Summer School, LAPP</b> <a href="#">[certificate]</a> <ul style="list-style-type: none"><li>The aim of the school was to provide theoretical and hands-on training on Data Science and Python development for Astronomers. <a href="https://github.com/escape2020/school2021">[github.com/escape2020/school2021]</a></li></ul>
January 2021	<b>The 2020 University Physics Competition</b> <a href="#">[report; certificate]</a> <ul style="list-style-type: none"><li>Earned bronze medal</li><li>For computing trajectory and fuel required for Ion Thruster powered Space-craft from Earth to Saturn; utilized open-sourced repo PoliAstro for orbital calculations and a python script for fuel calculations.</li></ul>
June - Sept 2020	<b>SWANtenna20 - Antenna Design Challenge: Online</b> <a href="#">[certificate]</a> <ul style="list-style-type: none"><li>Participated in SWANtenna20 conducted by TLC IUCAA, Pune.</li><li>It involved simulating a novel design of dual orthogonal linear polarization antenna with effective radiative coupling over 50 MHz to 500 MHz.</li><li>As a follow-up to this project, I was able to simulate a novel vertically stacked kite shaped antenna <a href="#">[preprint]</a></li></ul>

<b>November 2020</b>	<b>Vela Pulsar: Dispersion measure and time period</b> This project involved writing a python based analysis pipeline for computing the dispersion measure and the time period of the Vela Pulsar(PSR J0835-4510) using the data collected by the Ooty radio telescope. [ <a href="#">Vela Analysis</a> ]
<b>February 2020</b>	Poster: " <b>Indian Sky Watch Array Network : A Strategic Initiative</b> " <ul style="list-style-type: none"> <li>Mind Bend 2020, SVNIT, Surat, India.</li> </ul>
<b>January 2020</b>	<b>Hands-On Programme</b> <ul style="list-style-type: none"> <li>Sky Watch Array Network, Raman Research Institute, India</li> <li>Hands-on experience with Murchison Widefield Array(MWA) at Gauribidanur Field Station(GBD), RRI, India.</li> </ul>
<b>March - May 2019</b>	<b>SWAN Imaging Challenge: Online</b> <ul style="list-style-type: none"> <li>Participated in the imaging challenge which involved making a 100 <i>sq deg</i> radio image of CAS-A from the data collected during late 2017 by the Sky Watch Array Network, RRI, India.</li> </ul>
<b>May - June 2019</b>	<b>Visiting Student</b> <ul style="list-style-type: none"> <li>Digital Signal Processing Lab, Raman Research Institute, Bangalore, India</li> <li><b>Advisor:</b> Prof. Avinash Deshpande</li> </ul>

## PUBLICATIONS
